

ADRIAN TOBI

INTERNSHIPS/ WORK EXPERIENCE

Front-End Developer WeDance

WeDance is a closed social network for dancers and non-profit international dance community.

July 2022 to September 2022 (3 months)

- Used Vue.js to fix bugs given by various tickets on the github codebase.
- Helped in designing and building the new WeDance version.

Front-End Developer Ikebio Clothing

April 2022 to June 2022 (3 months)

- Created the website using the service Shopify to enable the business owner to make changes without my help in the future using the simple system.

Software Engineer Goldman Sachs

August 2021 to September 2021 (2 months)

- Cracked leaked password database that had different hashing types like SHA-256, MD5 etc.
- Used services like hashcat to run the passwords through different hashing algorithms and crack them using methods such as brute force.

Software Engineer JP Morgan Chase & Co.

July 2021 to August 2021 (2 months)

- Built an interface with a stock price data feed for users to check different stock.
- Used JPMorgan Chase frameworks and tools to display data visually for traders.

PROJECTS

DarkUx (formerly known as LofiAt)

<https://lofiat.github.io>

2021 to Present

- I created a study space service to run on laptops, tablets and other larger devices.
- I wrote all of the code using the following technologies: HTML, CSS and JavaScript.
- I worked using the Google api as well as that of YouTube.

Photography Portfolio

<https://adriantobi.github.io>

2022

- I created a simple portfolio website that I use for my photography services.
- It also made this using HTML, CSS and JavaScript.

REPAT

2021 to Present

- I helped a paediatrician to create an online tool for patient diagnosis.
- This was one of the most challenging projects I had made, it was the first time I handled any back-end.

Developer Portfolio

<https://adriantd.com>

2022

- I built a personal portfolio to display all of my projects as well as my experience as a developer.
